

LEA Natural Resources Education Series * and LEA Events Calendar

All events start at the LEA office, 230 Main Street, Bridgton, unless another location is specified.

A \$5 fee is requested from non-members. If space is limited, LEA members will have preference.

Registration in advance is required so please sign up early by contacting Mary Jewett at mary@leamaine.org

Program	Date	Time	Guide	Place
Big Night Training - Get ready for this spring's amphibian migration by attending an interactive presentation on our Big Night migrants. By the first warm rain in April, LEA would like as many helpers as possible to assist thousands of amphibians crossing local roads to their wetland homes. Come learn about vernal pool species and sign up for the Big Night email list.	Tuesday March 22	6pm	Mary	MLSC
Advanced Contractor Certification - Basic and advanced training on erosion control for contractors. For more information contact Colin Holme at 207-647-8580 or email colin@leamaine.org .	Wednesday March 23	8-4	Colin	MLSC
Contractor Recertification - Erosion control, setbacks and regulations around the water for contractors already certified. For more information contact Colin Holme at 207-647-8580 or email colin@leamaine.org .	Wednesday April 20	8-12	Colin	MLSC
Signs of Spring - Come help LEA educators explore the woods around the Maine Lake Science Center for signs of spring. April vacation is the perfect time to look for amphibians in Maine woods. Participants will learn about the frogs and salamanders who call Maine home and do fun spring crafts.	Thursday April 21	10am	Mary and Alanna	MLSC
Bird Walks - Join LEA naturalist Mary Jewett for two early morning bird walks at the beautiful Bob Dunning Bridge in Bridgton. Some of the birds we saw last year included: flycatchers, orioles, vireos, and several species of warbler. The lack of leaves in early May allows birders a chance to see these colorful migrants clearly. Binoculars are a must for these walks. LEA has a limited supply so please let us know if you need a pair.	Friday May 6 and 13	7am	Mary	Bob Dunning Bridge
Wildflower and birds - Botany enthusiast Ursula Duve and LEA Naturalist Mary Jewett team up for this wonderful walk combining two very popular subjects. Participants will have an opportunity to learn about the wildflowers blooming along the trails as well as the many migrating birds flying through the preserve. Binoculars are encouraged.	Friday May 20	9am	Mary and Ursula Duve	Holt Pond

LEA Natural Resources Education is made possible in part through the generous support of Dr. Hu and Ray Caplan, long-time LEA board members and supporters. The Caplans recognize the importance of education in all aspects of LEA's work in protecting the Lake Region's most important resources and assets: its lakes and watersheds.

Dates and times are subject to change. Contact Mary Jewett at 647-8580 or mary@leamaine.org to sign up for events.
