Comments:

DO NOT CHANGE THIS FORM!

V/P: V=Volunteer inspector; P=Paid inspector *IMPORTANT— Record the entire boat's bow registration number.
 **Invasive plant identification must be done by Lake Stewards of Maine or DEP so send all suspicious plants for identification.

STOP AQUATIC HITCHHIKERS

Aquatic Invasive Species such as Eurasian watermilfoil, Asian clam and spiny water flea can spread between waterbodies on boating and fishing equipment that has not been cleaned, drained and dried. Help protect Maine waters by following the simple steps below.

CLEAN off all plants (even small fragments), animals and mud from boat, trailer, and equipment.

DRAIN water from boat, motor, bilge, live wells and other equipment well away from water.

DRY boat and gear completely to kill hard to see small-bodied organisms. If you can't dry equipment, rinsing with hot, high pressure water will also remove many small-bodied organisms.

NEVER release plants, live fish or animals into a water body unless they came out of that body of water.
