

Compare and Contrast

How are the leaves you found similar? _____

How are they different? _____

Leaves in the Forest

Did you know?

- . Maine has lots of different kinds of trees
- . Different trees have different kinds of leaves
- . Leaves make food for the tree through a process called photosynthesis

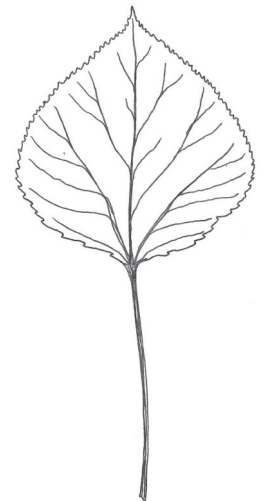

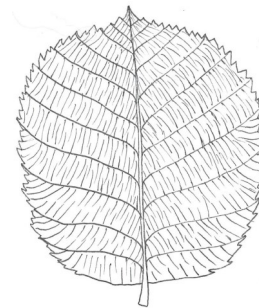

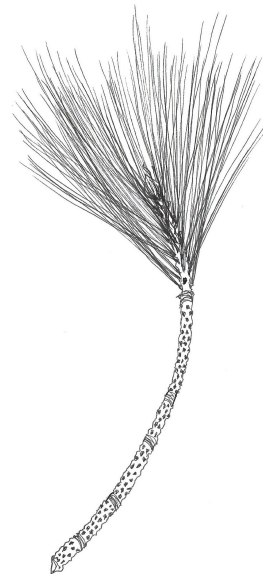

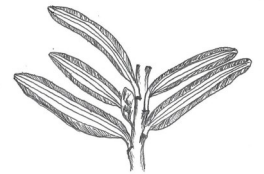

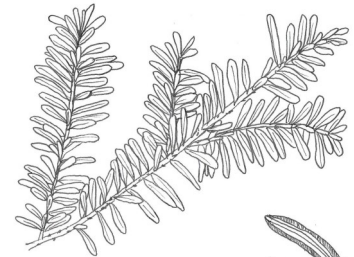

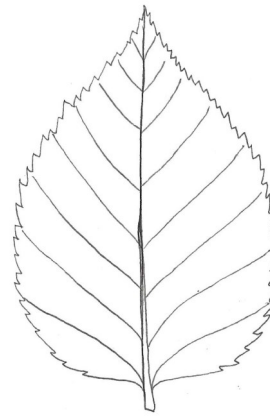

Name: _____

Leaf Rubbings

Do some leaf rubbings of
leaves you find:

Leaf Observations

Circle leaves that you see:

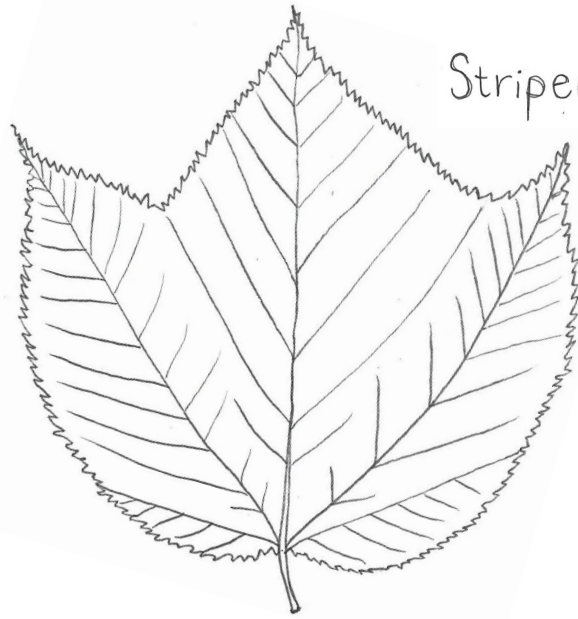

I learned:

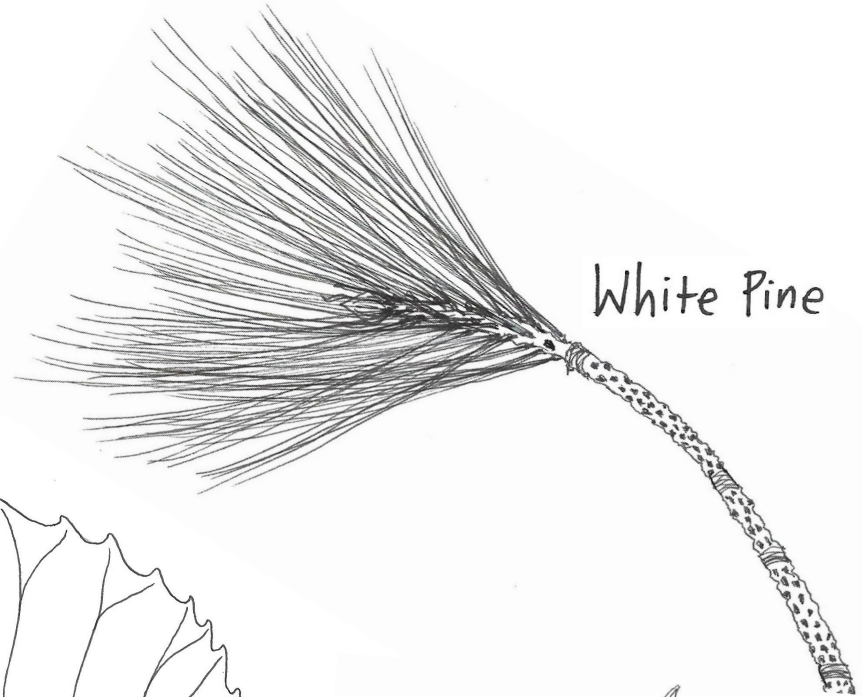

Leaf Colors

To survive the winter,
deciduous trees lose their
leaves. They stop making food
from the sun and leaves
change to a new color. What
colors did you see today?

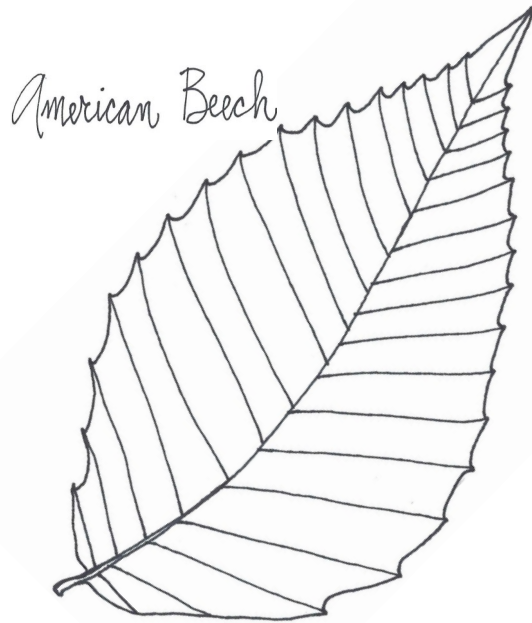

Color the leaves the color they are in the forest right now:

Striped Maple

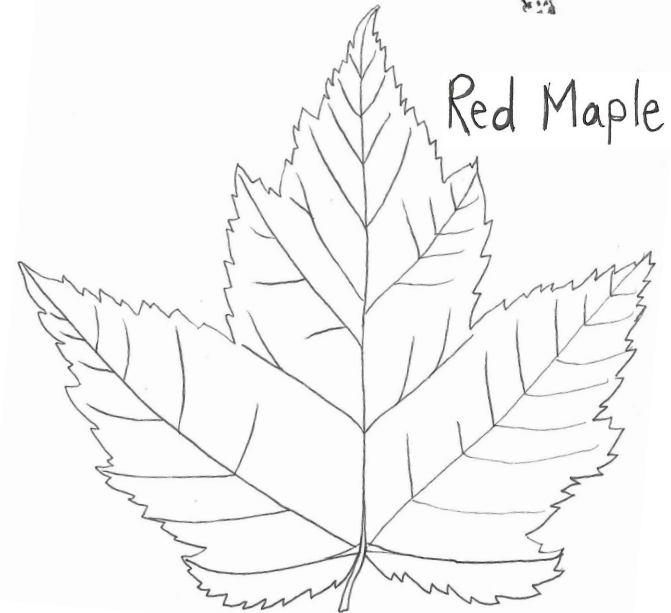

White Pine

American Beech

Bigtooth Aspen

Red Maple
